

DRAINLight UV™

Keeps HVAC drain lines clear of biogrowth

UV Light for HVAC condensate disinfection

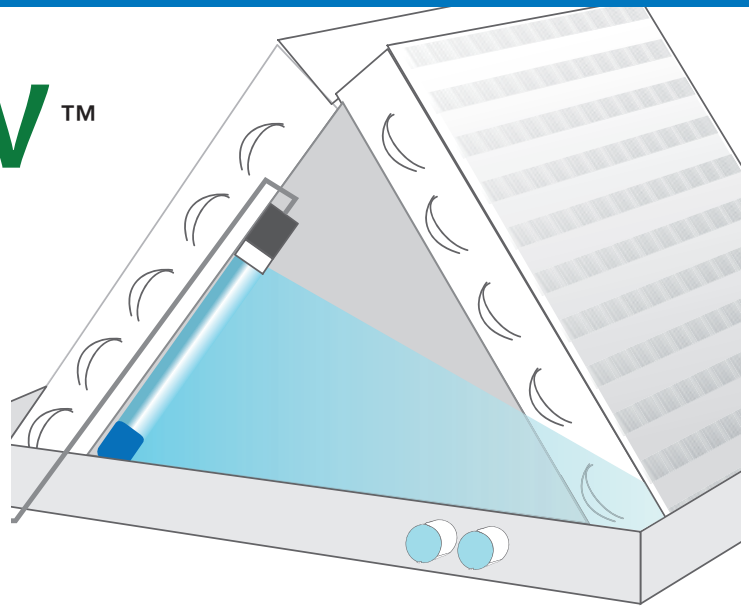

UV-C light is highly effective against **Zoogloea** — the bacteria that causes drain line clogs

Complete kit or add-on accessory to existing Ultravation and Solaris UV systems such as EZUV.

UltraMAX™ UV lamp works 24/7 to keep drain lines clean and clear

No chemicals to replenish or add to the environment!

18,000 hour UV-C lamp life —
Replace lamp every 2-years during scheduled HVAC maintenance calls

Kills bio-growth in HVAC condensate to help prevent drain line clogs

Ozone Free

*Conforms to UL 2998 (3rd Edition, July 10, 2020) clause 6.2, emittance of ozone not exceeding a concentration of 0.005 ppm.

HVAC condensate completely laden with Zoogloea

ADDITIONAL FEATURES

- Easy installation — especially when adding to an existing Ultravation UV system
- Compact design — works with any HVAC coil and drain pan configuration
- Multiple mounting options. Magnets, clips and ties included for optimized installation and versatility
- Stainless steel mounting shield and drain panels

UPGRADE KIT

EZ-Light-4-DUV

Accessory add-on to an Ultravation UV system

UltraMAX UV-C Lamp, 6ft cable, connection adapter and installation accessories

FULL KIT

UMX244EZ-DUV

Stand-alone system includes power supply

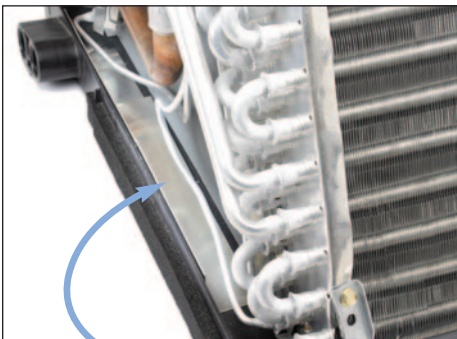

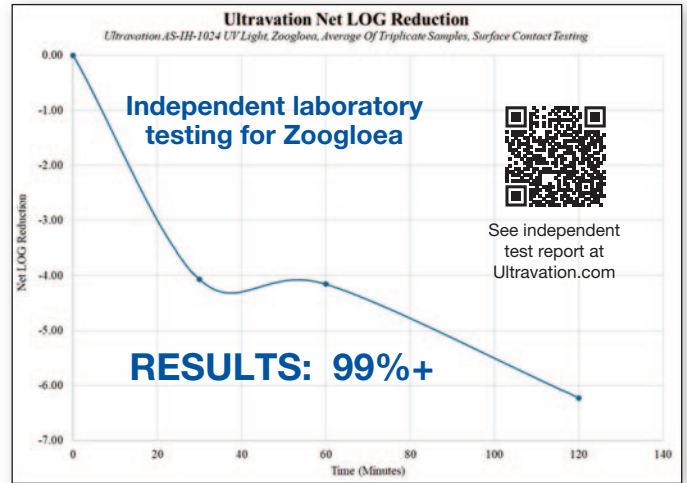

Full kit adds 24-volt power supply

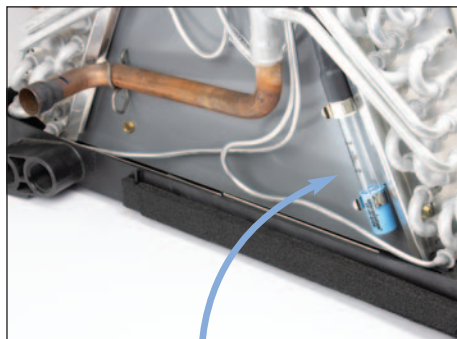

Stop HVAC Drain Line Clogs And the water damage they cause

All HVAC systems remove humidity from the air. The moisture on surfaces promotes bio-growth that not only clogs cooling coils, it creates a slimy mess that can clog the drain lines. Ultravation UV systems keep coils clean and efficient.

DRAINlight UV™ design focus is specifically on disinfecting water that collects in an HVAC drain pan before it passes into drain lines. *This dramatically reduces the chance of clogs that can cause an overflowing drain pan, resulting in water damage.*

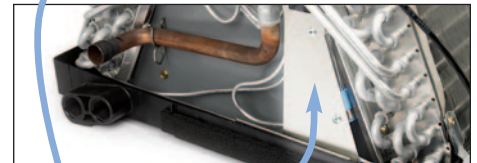

2-piece stainless steel drain panels are easily installed for enhanced UV disinfection

Lamp and cable assembly with magnet-mounts allows many options for lamp positioning

Horizontal lamp mounting

Shielding provided to restrict UV to drain pan area

Here are just some of the bacteria and viruses UV-C light will inactivate

- Legionella pneumophila
- Pollen
- Fungi
- Ragweed
- Dust mites
- Sick Building Syndrome

- Measles
- Tuberculosis
- Chicken Pox
- Humidifier
- Microplasma pneumoniae
- Penicillium expensum
- Cryptococcus
- Stachybotrys atra
- Neoformans
- Mucor ramosissimus

- Aspergillus niger
- Adenovirus
- Coxsackievirus
- Mycrobacterium kansasii
- Mycrobacterium aviumintra
- Streptococcus pyogenes
- Bacillus anthraci
- Zoogloea
- Cornebacterium diptheria
- Serratia marcescens

- Neisseria meningitidis
- Moraxella
- Acinetobacter
- Haemophilus influenzae
- Pseudomonas aeruginosa
- SARS-CoV-2
- Coronavirus
