SOLARIS®

PowerModule for Whole House Indoor Air Quality System

Bring cleaner air to your life™

Designed and Manufactured in USA!

A bright, modern interior with large windows and a white sofa. The background is a soft-focus photograph of a living room with large windows and a white sofa. The text is overlaid on this background.

As people spend as much as 90% of their time indoors—and according to the EPA, they do—it makes sense to optimize Indoor Air Quality (IAQ).

The Solaris IAQ **system** is the comprehensive approach to improving the healthfulness of indoor air with the versatility to enable customization, focus and even expansion!

With Solaris, you create a single, unified IAQ system by selecting the needed level of filtration, UV disinfection and air purification to fit the needs of the home, office, or professional facility.

SOLARIS® IAQ PowerModule: The Heart of a Solaris Indoor Air Quality System

BUILDING A WHOLE HOUSE CUSTOM IAQ SOLUTION

Contaminated household air with odors, allergens, airborne chemicals, VOCs and particulates of all sizes enter the system

Fresh clean air!

The IAQ PowerModule is the control center and single efficient power source for all of the electronic components in a Solaris Whole House IAQ system. Each connects to the module for power and for performance / status monitoring of the UV lamps used for disinfection and purification processes.

The Solaris IAQ PowerModule efficiently operates ALL Solaris IAQ electronics and monitors UV lamps
